Bhukya Lachiram Nayak

Bengaluru, India — +91-9618105512 — bhukyalachiramnayak9@gmail.com — linkedin.com/in/lachiram — github.com/lachiram

SUMMARY

Computer Science graduate from **IIT Tirupati** targeting **Associate Product Manager** roles in **AI and technical products**. Ships end-to-end: authored AI product PRDs, built a production RAG assistant, and drove **₹1.30 Cr in 8 weeks** at Unacademy while leading a 10-person team. Combines engineering fluency (Python, ML, system design) with user research across Tier 2/3 markets to move from discovery to launch — comfortable specifying LLM workflows, evaluation criteria, and API-level architecture with engineers.

EDUCATION

Indian Institute of Technology (IIT), Tirupati — B.Tech, Computer Science — Tirupati, India · 2022 – 2026

- **Academic Track Record:** Senior Secondary (TGBIE): **97.9%** · Secondary (SSC): **10.0/10 CGPA** (*Rank 1 in Municipality*).
- **Leadership & Roles: Head of Marketing** — Tirustava Fest · **Class Representative** (2025–2026).
- **Honors: Gold Medalist** — Intra-IIT Sports Championship (Cricket, 2024).

WORK EXPERIENCE

Software Engineer Intern — Atoll Solutions — Bengaluru, India · Jan 2026 – Present

- Shipped reliability improvements across logging, load balancing, and DB recovery contributing to **99% uptime**; documented redundancy-vs-cost tradeoffs to support engineering prioritization.
- Partnered with senior engineers on production feature scoping by mapping failure modes, dependency risk, and user impact — translating technical constraints into decision inputs.

Machine Learning Intern — Easily Done — Bengaluru, India · May 2025 – Jul 2025

- Shipped a credit-risk scoring model for an **underbanked lending product**; defined risk segments, success metrics, and eligibility rules integrated directly into the underwriting flow.
- Cut prediction error by **28% (MAPE)** via domain-informed feature engineering and ML pipelines (XGBoost, Random Forest, Optuna); worked with underwriters to translate expert intuition into model inputs.

Sales & Product Funnel Intern — Unacademy — Tirupati, India · May 2024 – Jul 2024

- Generated **₹1.30 Cr revenue in 8 weeks** across 87 high-ticket funnel touchpoints; ran structured experiments on pitch scripts and objection handling to lift conversion.
- Led a **10-member outbound team**; instrumented daily CRM funnel metrics and iterated acquisition strategies against drop-off analysis and cohort behavior.

AI & PRODUCT PROJECTS

RiskGuard — AI Fraud Detection Platform (AI Product PRD & System Architecture) — **View PRD**

- Authored an end-to-end **AI Product Requirements Document** for a real-time fraud-scoring platform; specified a **<40ms P99 latency budget**, ML scoring workflow, and architecture using Kong, Spring Boot, Redis, and Kafka with adaptive rate limiting.
- Defined model decision boundaries, precision/recall thresholds, human-review escalation logic, and rollout guardrails; modeled a target **42% reduction** in fraud losses against a rules-based baseline.

Construction AI Assistant (RAG, FastAPI, LangChain, ChromaDB, OpenAI, Docker) — **View Project**

- Scoped a **RAG-powered AI assistant** to eliminate slow, error-prone contract lookups on construction sites; defined retrieval quality, source-grounding, and hallucination-guardrail requirements before build.
- Shipped end-to-end MVP with document ingestion pipeline, vector retrieval (ChromaDB), and answer generation (OpenAI); designed evaluation rubric covering answer accuracy, citation fidelity, and latency.

Aspire — IIT-JEE Learning Platform (Founder & Product Lead) — **0-to-1 Discovery & Pilot**

- Ran **20+ qualitative user interviews** across Tier 2/3 markets to validate willingness-to-pay, price anchors, and top friction points in existing test-prep alternatives.
- Modeled unit economics and CAC/LTV assumptions, designed the onboarding funnel, and shipped a localized GTM pilot to test acquisition channels before full build-out.

SKILLS & TOOLS

Product:	PRD Authoring, User Research & Interviews, Wireframing (Figma), RICE Prioritization, A/B Testing, Funnel Analytics, Jira
AI Product:	LLM Application Design, RAG Systems, Prompt Engineering, Evaluation & Guardrails, Agent Workflows, Claude, ChatGPT/OpenAI APIs, LangChain
Technical:	Python, SQL, Java, System Design, REST APIs, Microservices, Docker, Git, React.js, ML (XGBoost, Random Forest)
